PROFESSIONAL SUMMARY

Software Engineering graduate with practical ICT support experience and a strong foundation in ICT infrastructure, network administration, information security, hardware/software troubleshooting and information systems. Experienced supporting users, troubleshooting technical issues, maintaining system reliability and working with Windows and Linux environments. Knowledge of TCP/IP, IPv4/IPv6, LAN/WAN, IP addressing, subnetting, routing, routers, switches and cybersecurity fundamentals. Also experienced in Python, JavaScript, databases, REST APIs, Git/GitHub and software testing. Strong problem-solving and analytical skills with the ability to work independently, collaborate with teams and learn new technologies.

CORE ICT & TECHNICAL SKILLS

ICT Infrastructure: Hardware and software troubleshooting, system maintenance, software installation, ICT infrastructure support, preventive maintenance, technical documentation.

Network Administration: TCP/IP, IPv4, IPv6, LAN/WAN, IP addressing, subnetting, routing fundamentals, routers, switches, network troubleshooting, Cisco Packet Tracer.

Cybersecurity: Cybersecurity fundamentals, information security, security controls, authentication, data protection, threat awareness and secure system practices.

Software & Programming: Python, JavaScript, SQL, HTML5, CSS3, React.js, Flask, FastAPI, REST APIs, JSON.

Databases: PostgreSQL, MySQL, SQLite, MongoDB and relational database concepts.

Tools: Git, GitHub, VS Code, Postman, Cisco Packet Tracer, Microsoft Office and Google Workspace.

PROFESSIONAL EXPERIENCE

ICT / Software Development Industrial Attachment

Murang'a County Government | 2024

- Provided technical support and troubleshooting for internal systems and users.
- Assisted with hardware, software and system-related technical issues.
- Supported maintenance of IT infrastructure and reliable day-to-day system operations.
- Assisted users with technical issues involving internal systems and information-processing workflows.
- Applied networking and computer systems knowledge to practical workplace support requirements.
- Followed structured troubleshooting processes to identify and resolve technical problems.
- Gained practical exposure to organizational IT operations, user workflows and system support.

Freelance Software Developer & IT Technical Contributor

Remote | 2025 - Present

- Develop and maintain practical software applications using Python, JavaScript, FastAPI and React.
- Troubleshoot software and application issues through structured diagnosis, testing and debugging.
- Work with databases, APIs and information-processing workflows.

- Apply validation and testing practices to improve application reliability and data integrity.

SELECTED TECHNICAL PROJECTS

KYC Identity Verification System

GitHub: https://github.com/kypchumba/KYC_verification_system

- Developed a Python and Flask identity-verification system involving document processing and structured customer information workflows.
- Implemented OCR and computer vision techniques for processing identification documents.
- Built validation and verification workflows to identify discrepancies in submitted information.
- Applied security-conscious handling of identity information and structured application workflows.
- Tested and debugged the system to improve reliability and performance.

Lifestyle Health

GitHub: <https://github.com/kypchumba/lifestyle-health>

Live: <https://lifestyle-health.vercel.app>

- Developed a responsive health and lifestyle web application with a focus on clear content presentation and user experience.
- Built and maintained frontend components and page layouts for different screen sizes.
- Implemented interactive product and content interfaces using modern web development tools.
- Tested, debugged and refined website functionality to improve usability and reliability.

EDUCATION

Murang'a University of Technology

Bachelor of Science in Software Engineering | 2021 – 2025

Relevant areas: Cryptography & Cybersecurity fundamentals, Computer Networks, Information Systems, System Programming, Database Management Systems, Software Engineering, Data Structures and Algorithms, Web Application Development and Data Analysis.

CERTIFICATIONS & TRAINING

- Cisco Networking Academy - Introduction to Cybersecurity
- Practical experience with Cisco Packet Tracer and networking fundamentals

KEY AREAS OF FIT

ICT Infrastructure Management • Network Administration • Cybersecurity & Security Management • Technical Support • Hardware & Software Troubleshooting • Information Systems • System Maintenance • Problem-Solving • Communication & Teamwork • Continuous Learning
